## High-speed 10/100 Switching for Rackmount or Desktop Installations

With its advanced switching technology, the Linksys 24-Port 10/100 Switch will boost your network performance with much more than just full duplex data transfer and dedicated bandwidth. It features non-blocking, wire-speed switching that forwards packets as fast as your network can deliver them. Also included are Address Learning and Aging to prevent data transfer errors and Data Flow Control to help prevent packet collisions.

The SR224R is designed to fit in a standard equipment rack using the included rack mount brackets. However, its minimal depth and fanless design makes it suitable to be located anywhere.

No matter how intensive your network demands, the Linksys 24-Port 10/100 Switch has speed, flexibility, and reliability that you can count on.
