

## Skype with Handset Convenience!

Get cordless handset convenience when you use Skype! Now you don't have to sit in front of your computer when you want to talk to your friends. The Linksys Dual-Mode Internet Telephony Kit comes with the handset, charger, and a USB Base Station that plugs into your computer. Dual-Mode capability lets you choose whether to make calls over a standard telephone line or with the Skype application running on your PC. Just select who you want to talk to from your contact list on your Handset, press a button, and get ready to talk.

Of course, the Handset supports SkypeOut dialing as well as your Skype contact list. It rings when you have a Skype or SkypeIn call coming in, and shows the caller ID on the screen. The Handset also supports call waiting and Skype's optional Voicemail service. When you're on a call, you can hit the Mute button for privacy, or use the speakerphone function to let everyone join in.

In short, the Linksys Dual-Mode Internet Telephony Kit allows you to choose to make calls to Skype users or over your existing standard telephone line. You'll get the convenience of a cordless phone and all its features, plus the high-quality voice reception that you get from Skype on your PC, without being tied to your computer.

Standard Cordless Phone with Skype support

You don't have to sit in front of your computer to talk on Skype

Your Skype contact list is right there on the handset display

Supports Skype, SkypeOut™, SkypeIn™ and Skype Voicemail™
