

# HP M220 802.11n Access Point Series

## Key features

- IEEE 802.11a/b/g/n access point
- Single-radio, dual-band (2.4 GHz or 5 GHz)
- Simplified wireless LAN administration with clustering technology
- Powered by IEEE 802.3af PoE or included power supply
- Lifetime warranty

## Product overview

HP M220 802.11n Access Points are dual-band, single-radio devices supporting high-speed wireless networking at 5 GHz or 2.4 GHz. They are fully compatible with the high-speed IEEE 802.11n wireless standard and backward-compatible for legacy IEEE 802.11a/b/g support. They can run standalone or can be "clustered" for simplified administration of multiple M220 access points. With clustering, configuration changes automatically propagate across all M220 access points in your network. Clustering technology requires no wireless controller or additional hardware, enabling you to keep your network easily accessible yet secure. HP M220 802.11n Access Points come with a lifetime warranty.

## Features and benefits

### Management

- **Centralized wireless LAN management (clustering)**
  - **Simplified access point management**  
configuration parameters enabled on one access point pass to all members (up to 10 APs) of the cluster, eliminating the need to individually configure each AP
  - **Auto channel planning**  
access points in a cluster are automatically assigned to a channel that reduces interference between adjacent APs
  - **Client connection list**  
access any member of the cluster to view information about clients connected to any clustered AP
- **Secure and easy-to-use Web UI**
  - **Quick setup page**  
consolidates key settings into one page for simple and rapid configuration for common deployment scenarios
  - **HTTPS secured management sessions**  
prevent management sessions from being observed on the network

### Connectivity

- **Fully IEEE 802.11n-compliant dual-band access point**
  - **2.4 GHz frequency band support**  
uses your IEEE 802.11n wireless clients alongside legacy IEEE 802.11b/g devices
  - **5 GHz frequency band support**  
operates your IEEE 802.11n and 802.11a devices in the 5 GHz spectrum, which has less interference from microwave ovens, Bluetooth devices, and cordless phones
- **IEEE 802.3af PoE-powered device (PD) option**  
simplifies deployment and dramatically reduces installation costs by helping to eliminate the time and cost involved in supplying local power at each access point location
- **Auto-MDIX**  
automatically adjusts for straight-through or crossover cables on the 10/100/1000 port
- **Spanning Tree Protocol (IEEE 802.1D)**  
prevents network loops
- **IPv6 support**  
the M220 Access Point provides native support for IPv6, the newest version of the Internet Protocol, as well as the previous IPv4 standard

### Mobility

- **Service-class segmentation**
  - **Up to eight SSIDs (one per wireless community)**  
allows administrator to identify multiple service sets for clients to access
  - **Up to eight VLANs (one per wireless community)**  
IEEE 802.1Q VLAN tagging provides security and traffic control between workgroups
- **Auto channel select**  
helps reduce radio co-channel interference by automatically selecting an unoccupied radio channel
- **Wireless Distribution System (WDS)**  
allows the M220 access point to connect wirelessly to other HP M220 access points without a wired backbone; this is useful for extending the network across areas where no wired infrastructure exists
- **Internal MIMO omni-directional antennas**  
provides omni-directional radio coverage without the need to manually adjust antenna placement
- **Interoperability**  
meets Wi-Fi Alliance certifications, including IEEE 802.11n Wi-Fi and WPA2 to help provide multivendor interoperability

### Security

- **Choice of IEEE 802.11i, WPA2, or WPA**  
locks out unauthorized wireless access by authenticating users prior to granting network access; robust Advanced Encryption Standard (AES) or Temporal Key Integrity Protocol (TKIP) encryption secures the data integrity of wireless traffic
- **RADIUS-based user authentication**  
authenticates a user with a RADIUS server based on user credentials
- **RADIUS-based MAC authentication**  
authenticates a wireless client with a RADIUS server based on the MAC address of the client; this is useful for clients with minimal or no user interface
- **RADIUS-based VLAN assignment**  
places wireless client on RADIUS-assigned VLAN
- **Secure Sockets Layer (SSL)**  
encrypts all HTTP traffic, allowing secure access to the browser-based management interface of the access point
- **Closed system**  
restricts broadcast of SSID as a security measure to conceal presence of the wireless network
- **Management password**  
provides security so that only authorized access to the Web browser interface is allowed
- **Wired Equivalent Privacy (WEP) using 64- and 128-bit encryption**  
provides backward compatibility for legacy clients

- **Rogue AP detection**  
identifies all access points in range; known or trusted access points can be saved, allowing network administrators to identify unauthorized access points
- **Local wireless bridge client traffic filtering**  
when enabled, prevents communication between wireless devices associated with the same access point

## **Warranty and support**

- **Lifetime warranty**  
for as long as you own the product with advance replacement and next-business-day delivery (available in most countries)†
- **Electronic and telephone support**  
limited electronic and telephone support is available from HP; to reach our support centers, refer to [www.hp.com/networking/contact-support](http://www.hp.com/networking/contact-support); for details on the duration of support provided with your product purchase, refer to [www.hp.com/networking/warrantysummary](http://www.hp.com/networking/warrantysummary)
- **Software releases**  
to find software for your product, refer to [www.hp.com/networking/support](http://www.hp.com/networking/support); for details on the software releases available with your product purchase, refer to [www.hp.com/networking/warrantysummary](http://www.hp.com/networking/warrantysummary)

†HP warranty includes repair or replacement of hardware for as long as you own the product, with next business day advance replacement (available in most countries). The disk drive included with HP AllianceOne Advanced Services and Services z1 Modules, HP Threat Management Services z1 Module, HP AllianceOne Extended z1 Module with Riverbed Steelhead, HP MSM765z1 Mobility Controller and HP Survivable Branch Communication z1 Module powered by Microsoft Lync has a five-year hardware warranty. For details, refer to the Software license and hardware warranty statements at [www.hp.com/networking/warranty](http://www.hp.com/networking/warranty).
